

USB DONGLE USER GUIDE

Device Name: BTV5

Standard: Bluetooth V5.0

Pairing Distance: within 50cm

Compatibility: Plug and Play for Win 10/ Win 7, driver-free

Transmission Distance: Max.20 meters without obstacle.

Special Function: can answer/end calls via certain headset models, support only calls from Microsoft Teams and Skype for Business.

Set Up:

1. Plug the dongle into any USB port on the computer.
2. Put the headset close to the dongle(less than 50cm), turn on the headset, the blue status indicator flashes during pairing.
3. It takes about 30 seconds for pairing to be successful.
4. The blue status indicator will be continuously on after pairing successfully.

Very Important:

* The first time you connect the dongle with your Bluetooth device, it takes about 30 seconds for pairing to be successful. Please be patient!

After that, it will connect fast and automatically with the last paired device when powered on.

* To connect the dongle with new device, please turn off Bluetooth of the paired device.
